

Find your training system

NEXUS / LIVE / TWO PLATFORM CHOICES

Physical forklift controls. Focused virtual practice. Choose the software and platform that fit your training program.

NEXUS - focused skill development

Targeted driving, load-handling and attachment exercises, with practice variants, scoring and session review. Supplied with a high-performance computer, VR headset, platform and controls, with software preloaded.

LIVE - connected instruction

Bring instructors and students into a shared training session. LIVE runs with Meta headsets and a basic computer for the driving setup, using either platform.

Fold N Go

Portable platform and travel case.

Classroom Standard

A dedicated training station.

NEXUS+ - In development for a planned Q1 2027 release: stand-up reach and stand-up counterbalanced lifts with OEM controls.

Simulation supports operator development; it does not replace practical training and workplace evaluation on actual equipment.
